9 Maintenance log

9.1 Use of maintenance log

Maintenance is required to sustain the required level of precision. This maintenance should at any time follow the latest updated maintenance instructions.

Some organisations require that the range responsible can provide documentation of this maintenance. We therefore suggest using the enclosed maintenance log or a similar system. Copy the maintenance form and insert then in this chapter for easy access at each range. We also propose to start with new log sheets for each season.

The maintenance log can be filled in as shown in the example below:

Owner	Frogn og Drøbak
Range	200m
Season	2002

Date/Time	Lane(s)	Maintenance	Init
10th May	1-16	Upgraded DU software to 3.51	PB
10th May	1-16	Upgraded CU software to 3.51	PB
11th May	1-10	Inspected and advanced rubber bands	PB
16 th May	1-3 and 7	New sighting rubber and foam in front target	PB

9.3 Counter log
